

ENERCOPLAN group is active in the Renewable Energy Sources sector, investing in the development of production plants as well as electricity storage using modern technologies.

The main development sectors of ENERCOPLAN is Wind Power and Pumped Storage projects. Our portfolio includes Wind Power Plants with a capacity of more than 250MW, Photovoltaic plants with a capacity of 28MW, electricity storage plants (Battery Energy Storage) with a total capacity of 168 MW and energy storage licenses through water pumped storage with a total capacity of 2.256 MW.

With our projects we support the goal of transitioning to a sustainable and clean energy production for the present as well as and country's future. Our projects aim either to produce clean energy or to save energy, and support stability and quality of the Electricity Grid.
